R Markdown

This is an R Markdown document. Markdown is a simple formatting syntax for authoring HTML, PDF, and MS Word documents. For more details on using R Markdown see http://rmarkdown.rstudio.com.

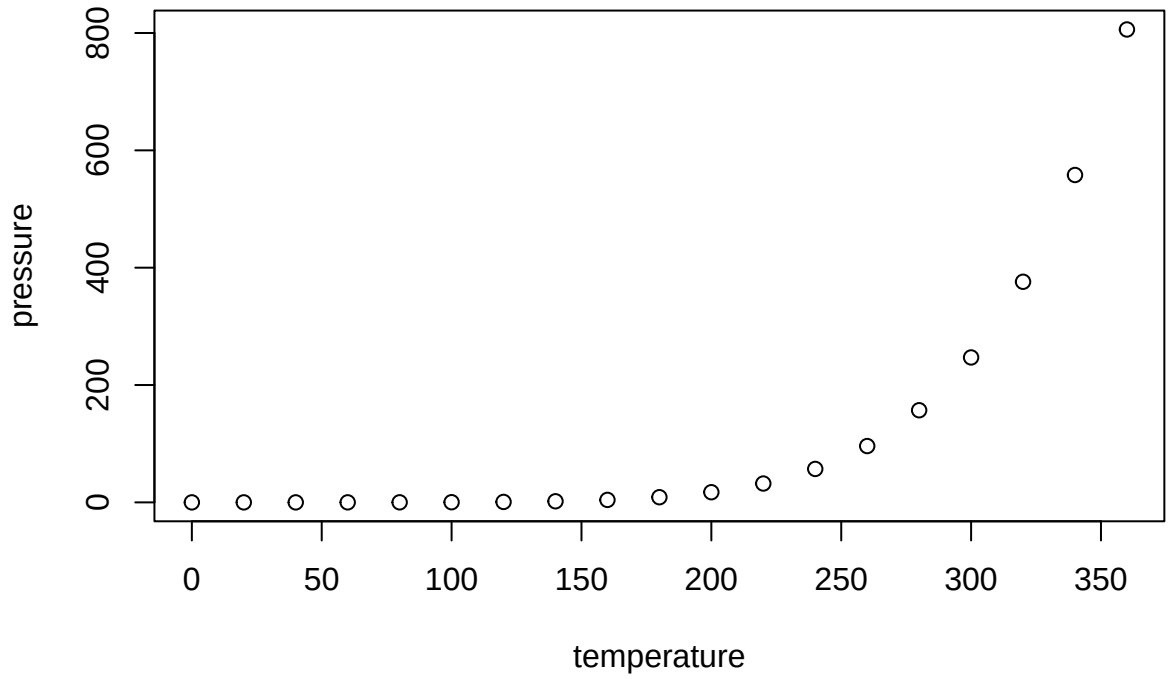
When you click the **Knit** button a document will be generated that includes both content as well as the output of any embedded R code chunks within the document. You can embed an R code chunk like this:

```
summary(cars)
```

```
##      speed           dist       
##  Min.   : 4.0   Min.   :  2.00  
##  1st Qu.:12.0   1st Qu.: 26.00  
##  Median :15.0   Median : 36.00  
##  Mean   :15.4   Mean   : 42.98  
##  3rd Qu.:19.0   3rd Qu.: 56.00  
##  Max.   :25.0   Max.   :120.00
```

Including Plots

You can also embed plots, for example:



Note that the `echo = FALSE` parameter was added to the code chunk to prevent printing of the R code that generated the plot.

Einleitung

Test Literatur

irgendwas geht schief schon Arntzen and Thorpe (1999) zeigt: das ist Mist bla (Arntzen and Thorpe 1999)

Invasive eingeführte Arten, die Neobiota, führen in vielen Fällen zur Verdrängung von einheimischen Arten und wird deshalb als Gefährdung der Biodiversität angesehen. Wie schon Clavero and Garcìa-Berthou (2005) zeigte.(Clavero and Garcìa-Berthou 2005)

Generell sind invasive Arten problematisch (Dufresnes et al. 2016)

Andere Aussagen bestätigen das durch das Band (Clavero and Garcìa-Berthou 2005)
