## R Markdown

This is an R Markdown document. Markdown is a simple formatting syntax for authoring HTML, PDF, and MS Word documents. For more details on using R Markdown see <http://rmarkdown.rstudio.com>.

When you click the **Knit** button a document will be generated that includes both content as well as the output of any embedded R code chunks within the document. You can embed an R code chunk like this:

```
summary(cars)
```

```
##      speed      dist
##  Min.   : 4.0    Min.   : 2.00
##  1st Qu.:12.0    1st Qu.: 26.00
##  Median :15.0    Median : 36.00
##  Mean   :15.4    Mean   : 42.98
##  3rd Qu.:19.0    3rd Qu.: 56.00
##  Max.   :25.0    Max.   :120.00
```

## Including Plots

You can also embed plots, for example:

Note that the `echo = FALSE` parameter was added to the code chunk to prevent printing of the R code that generated the plot.

## Einleitung

### Test Literatur

**irgendwas geht schief** schon Arntzen and Thorpe (1999) zeigt: das ist Mist bla (Arntzen and Thorpe 1999)

Invasive eingeführte Arten, die Neobiota, führen in vielen Fällen zur Verdrängung von einheimischen Arten und wird deshalb als Gefährdung der Biodiversität angesehen. Wie schon Clavero and García-Berthou (2005) zeigte.(Clavero and García-Berthou 2005)

Generell sind invasive Arten problematisch (Dufresnes et al. 2016)

Andere Aussagen bestätigendas durch das Band (Clavero and García-Berthou 2005)
